

# Lazaro

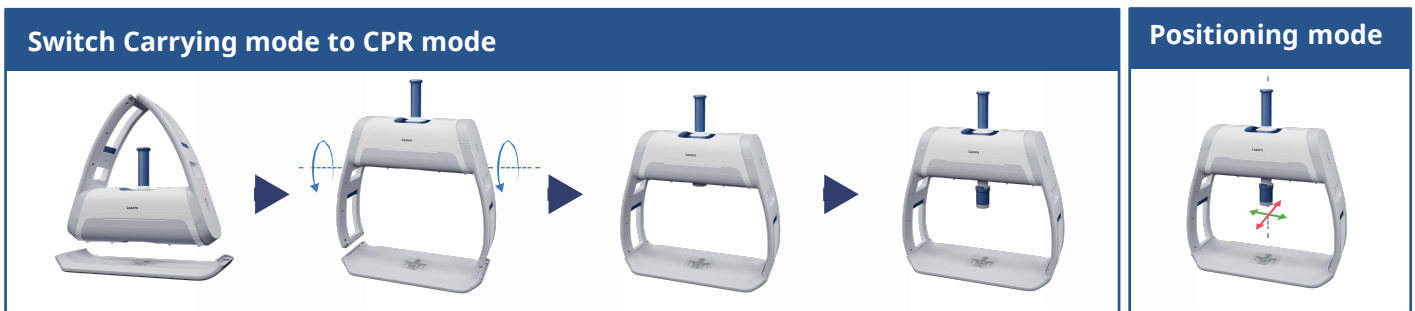

## Portable CPR Device

Blue Robin's Portable CPR Device 'Lazaro' is an easy-to-use mechanical chest compression device that helps emergency medical technicians deliver high-quality, guidelines-consistent chest compressions to sudden cardiac arrest patients; in the field, on the move, and in the hospital.

Blue Robin's compression positioning function can minimize the non-compression time. This innovative feature allows for more efficient and effective lifesaving care and provides the best possible CPR assistance to those in need.

You can also effortlessly switch between carrying and CPR modes with a simple rotation of the support legs. This enhances both mobility and usability in the field, making it a breeze to use in any situation.

### How to use?

### Specification

- **Patient Range:** Chest height 120-315mm, width up to 500mm
- **Compression Depth:** 50mm
- **Dimensions**
  - CPR Mode: W560 X D260 X H640(mm)
  - Carrying Mode: W560 X D260 X H452(mm)
- **Runtime:** max. 150 minutes
- **Battery Charging time:** 80 minutes
- **Weight:** 8.5kg  $\pm$  10%
- **Laser Guide:** Class II / 645nm /  $\leq$ 1mW
- **CPR Modes:** 30:2 / Continuous
